Bugs:
1. Go to projects, click on alloy project (or any project), click the edit project button, get this error:
    a. A <Select.Item /> must have a value prop that is not an empty string. This is because the Select value can be set to an empty string to clear the selection and show the placeholder.
    b. Console log:
    client:536 WebSocket connection to 'wss://bb1d30f8-d852-4bae-abcd-b7c4521e3d85-00-x9tsn55inx51.spock.replit.dev:5000/?token=OWjlvvU9L9Pn' failed:

React will try to recreate this component tree from scratch using the error
boundary you provided, ErrorBoundary.
overrideMethod @ hook.js:608
hook.js:608 Error caught by boundary: Error: A <Select.Item /> must have a
value prop that is not an empty string. This is because the Select value can
be set to an empty string to clear the selection and show the placeholder.

4. Sent messages not actually sending:

a.

b. Messaging Errors: notifications show 1 new direct message which isn't showing in our inbox and 2 new group messages that also aren't showing. The screenshot shows 2 group message threads, but no new messages within.

c.
